

# Articulation Agreement by Major

Effective during the 2022-2023 Academic Year

To: University of California, Irvine  
2022-2023 General Catalog, Quarter

From: De Anza College  
2022-2023 General Catalog, Quarter

## Psychological Science, B.A.

### GENERAL INFORMATION

The Psychological Science major provides students a foundation to pursue graduate work in psychology, or to find employment after graduation in the areas of public health, health services, human resources, marketing, social work, counseling, law, education, and related fields. The major focuses on determinants of human health, well-being, and functioning in a broad range of developmental, social, cultural, and environmental contexts. Undergraduate students begin with basic course work in developmental psychology, health and preclinical (abnormal) psychology, and social psychology. Subsequent courses cover such topics as social, emotional, and cognitive development in children, adolescents, adults; behavioral disorders and developmental psychopathology; counseling and therapy; cultural, social, and personality influences on behavior; attitude formation and change; health psychology; stress and coping; and psychology and the law. Opportunities are available to work with faculty members on research in these and other areas. Undergraduate research experience provides a valuable background for entry into many graduate programs.

Field study opportunities exist in hospitals, community health clinics, counseling centers, legal settings, environmental programs, social service agencies, schools and after-school programs, child care settings, and a wide variety of other community programs that offer a broad range of services.

Students should be aware that psychology courses are offered in several different departments and programs at UCI. Students interested in developmental, clinical, social, emotional, health, cross-cultural, or environmental psychology, or in psychology and the law, are advised to consult the course listings for the Department of Psychological Science.

These courses offer students a solid foundation in general psychology.

Students interested in perception, sensorimotor integration, and mathematical psychology are advised to consult course listings for the Department of Cognitive Sciences.

This major does not require completion of prerequisites for admission as a transfer student.

**NOTE:** In fulfillment of the requirements below, a single course may be used only once.

For information regarding the [AP and IB examination](#) credit policies refer to the UCI General Catalogue.
