

# Articulation Agreement by Major

Effective during the 2022-2023 Academic Year

To: University of California, San Diego  
2022-2023 General Catalog, Quarter

From: De Anza College  
2022-2023 General Catalog, Quarter

## Education Sciences B.S.

### GENERAL INFORMATION

Our Bachelor of Science will provide you with opportunities to explore the complex social, psychological, economic, historical, political, and cultural issues that impact our lives. Our overarching mission is to provide the resources for you to combine interactive academic coursework, hands-on service-learning experiences, and a deep understanding about the relationship between research and educational issues. You will reflect deeply on underlying educational principles and gain the insight needed to become advocates for equity and social justice within our society. Students are guided to develop an understanding of research and theory within the realities of practice and to use practice to reevaluate both research and theory.

The B.S. in Education Sciences provides interdisciplinary opportunities for undergraduate students. Graduates are prepared for careers in the global knowledge economy, with opportunities to apply learning modalities and technologies in multicultural contexts.

The major in Education Sciences provides a foundation for the study of education, focused on four domains. These include:

- Education in a Diverse Society
- Learning and Development
- Introduction to Learning Contexts
- Educational Research and Evaluation

Students are also encouraged to pick an area of focus, and may choose from the upper-division electives listed. Students may define their own area of focus, selecting from courses offered by EDS and other related departments with department approval.

Graduates may choose from career opportunities such as:

- Public Education
- Public Health
- Higher Education
- Educational Policy
- Non-Profit Organizations
- Curriculum Development

Many graduates will pursue advanced degrees leading to teacher credentialing or educational research. Graduates may also pursue careers in public education supporting students through counseling, school psychology, or student affairs.
