IMPORTANT TRANSFER INFORMATION

In addition to the Major Selection Criteria, all Upper-Division Transfer applicants must meet minimum [University of California admissions requirements](#). Visit <https://admissions.ucmerced.edu/transfer/requirements> for more specific UC Merced admissions information.

Prior to Transferring to UC Merced, please be advised of the following for Junior Transfers:

1) WRI 001 and WRI 010 are admissions requirements: In most situations, WRI 001 is fulfilled by IGETC 1A English Composition and WRI 010 is fulfilled by IGETC 1B Critical Thinking/English Composition. However best practice is to complete the articulated course for WRI 001 and WRI 010. Please scroll towards the bottom of the agreement to find the articulation for each course.

2) Transfer Admissions Guarantee (TAG): UC Merced is one of the six UC's that offers Transfer Admissions Guarantee. Please visit the TAG website for more information: <https://admissions.ucmerced.edu/transfer/tag>

3) General Education (GE Requirements): While general education is not required for admission, it can help speed up your time to graduation once you transfer to UC Merced. We highly recommend reviewing the [Transfer Students: Satisfying General Education](#) page in the catalog for a more extensive explanation of the requirements.

Please note the [School of Engineering](#) strongly discourages IGETC, but accepts it; students are encouraged to focus primarily on lower division major preparation and fulfilling UCM minimum admissions requirements. If you elect to complete IGETC, the courses may double count with the major

courses listed below. Please visit your Community College Counselor to learn more.

4. This agreement displays all lower-division (or Major Preparation) courses required in the major. UC Merced courses on the left, approved (articulated) transfer courses to the right.

5. Changes to this Agreements: Major requirements are subject to change from one academic year to the next. Newly-articulated courses are added on a rolling basis, and articulated courses can be revised. Visit ASSIST every semester for the latest information and consult with an Academic Counselor at your institution on a regular basis.

For more questions about admissions, please email: transfer@ucmerced.edu.

ABOUT THIS MAJOR

[Bioengineering](#) is a discipline that applies engineering principles to design and analyze biological systems and to develop biomedical technologies. The bioengineering undergraduate major prepares students for employment in professions that require seamless application of engineering design and problem-solving to biological and biomedical systems. Bioengineers are in high demand in industries such as health care, pharmaceuticals, biotechnology, bioinstrumentation, food, and agriculture. The bioengineering undergraduate degree also provides a solid foundation for medical and graduate schools and for careers in allied fields of government and policy. Bioengineering has led to the development of biocompatible implants, functional prostheses, sensitive diagnostics, precision medicines, sustainable agriculture, scalable biomanufacturing, and tools that have accelerated the pace of research and development in biomedicine. Bioengineers thus contribute solutions to key challenges that effect human health and the well-being of society.

Visit the [22-23 catalog page](#) for the Lower Division and Upper Division requirements for the major.
