PROGRAM

The undergraduate major in **Linguistics** introduces students to the traditions and techniques of research into the structure, functions, and histories of languages. Since the study of language draws from and contributes to many other fields of study, students choosing the Linguistics major are strongly urged to achieve a more than superficial acquaintance with some related but independent field: cognitive science, anthropology, mathematics, computer science or philosophy.

PREPARATION FOR TRANSFER AT THE JUNIOR LEVEL

Students interested in the major are advised to take introductory courses in language and linguistics.

There are no lower division prerequisites for the Linguistics major.
