

Articulation Agreement by Major

Effective during the 2022-2023 Academic Year

To: University of California, Santa Barbara
2022-2023 General Catalog, Quarter

From: De Anza College
2022-2023 General Catalog, Quarter

Creative Studies - Mathematics, B.A. & B.S.

GENERAL INFORMATION - COLLEGE OF CREATIVE STUDIES

All transfer applicants must satisfy University of California admissions eligibility requirements as well as meeting campus admission selection criteria. Completing the UC transfer admission requirements in English and mathematics by the end of the fall term prior to the fall application quarter makes an applicant more competitive for admission to UCSB. All admission requirements must be completed by the end of spring prior to transfer. For more information on UC admissions eligibility requirements and admission to UCSB, please visit the Admissions website: www.admissions.ucsb.edu

Applicants who apply to UCSB's **College of Creative Studies (CCS)** must submit a **supplemental CCS application** in addition to the UC application. Applicants are selected on the basis of outstanding academic and personal achievement, special talent, and capacity for excellence in one of the eight available majors. For more information, please visit the CCS website: www.ccs.ucsb.edu

Advanced Placement (AP) and **International Baccalaureate (IB)** exams may or may not be used to meet course requirements, depending on the exam. Please refer to the [AP Chart](#) and [IB Chart](#) in the [UCSB General Catalog](#) for information on how we use AP and IB exams.

CREATIVE STUDIES - MATHEMATICS, B.A. & B.S.

The CCS Mathematics program is a special curriculum designed to provide a format for aspiring mathematicians to discuss and solve non-routine problems in the various areas of mathematics. The curriculum was developed to accommodate students who are able to move to a high level of mathematical inquiry at a pace faster than the usual university curriculum would allow. Since most community college mathematics courses cannot apply to the requirements for this major, transfer students typically require a minimum of three years to complete this degree. Classes in Linear Algebra, Differential Equations, and Multivariable Calculus are strongly encouraged prior to applying to join the program.

For information about this major, please visit the College of Creative Studies website: www.ccs.ucsb.edu
